

Weight

Weight is used to ensure that your weighing scales, weighbridge are weighing correctly Legal Metrology Department and Weight & Measurement Department recommend that they are checked with calibrated weights on a daily, weekly, or monthly basis depending on how important the measurement is to your product or process and calibration of weighing instruments is mandatory by Legal Metrology department as it's considered in public affair sector.

According to the Legal Metrology Department, every weighing machine or Instrument must be calibrated and have calibration certificates on an annual basis. But there are a lot of other errors in the weighing machine which cause calibration error that's why Cast iron weight is needed.
