

STAMP PAPER BOX

Paper that has a pre-printed revenue stamp on it is known as stamped paper. Not all papers with stamps are used for mail. In order to collect taxes on documents that need to be stamped, such as leases, agreements, receipts, court documents, and many others, the stamped paper has been used extensively around the world. Aside from the pre-printed stamp, the papers can be purchased blank from stationers, law firms, post offices, and courts in accordance with local laws. Then, the parties to the dispute write out their legal business on the paper and submit it to the court or another party with an interest. This is a quick and easy way to stamp documents and collect taxes without having to take them to a different government stamp office. Stamp paper boxes are containers used to store certain stamp papers.
